

Potential implementation and application for management

Silvana Birchenough (Cefas, UK)

Summary of WP6

Solving the challenges to incorporating molecular methods into benthic marine community monitoring to meet policy requirements in the North Sea.

Contributing to the current level of marine benthic monitoring using molecular methods: An overview of the GEANS PROGRAMME to meet the North Sea policy needs.

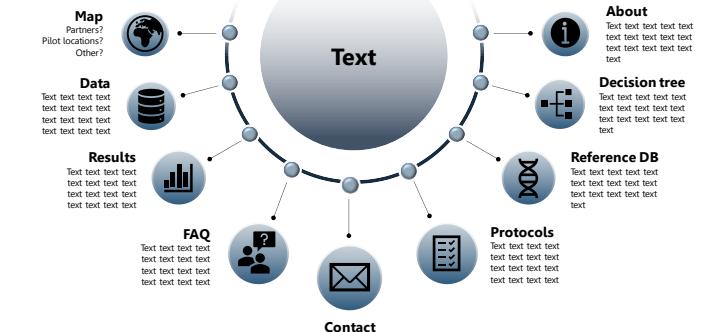

Molecular methods to complement the current marine benthic monitoring to support policy needs under a changing North Sea.

Phil I. Davison, Silvana Birchamough,

The aims are to summarise an overview and key messages from the project

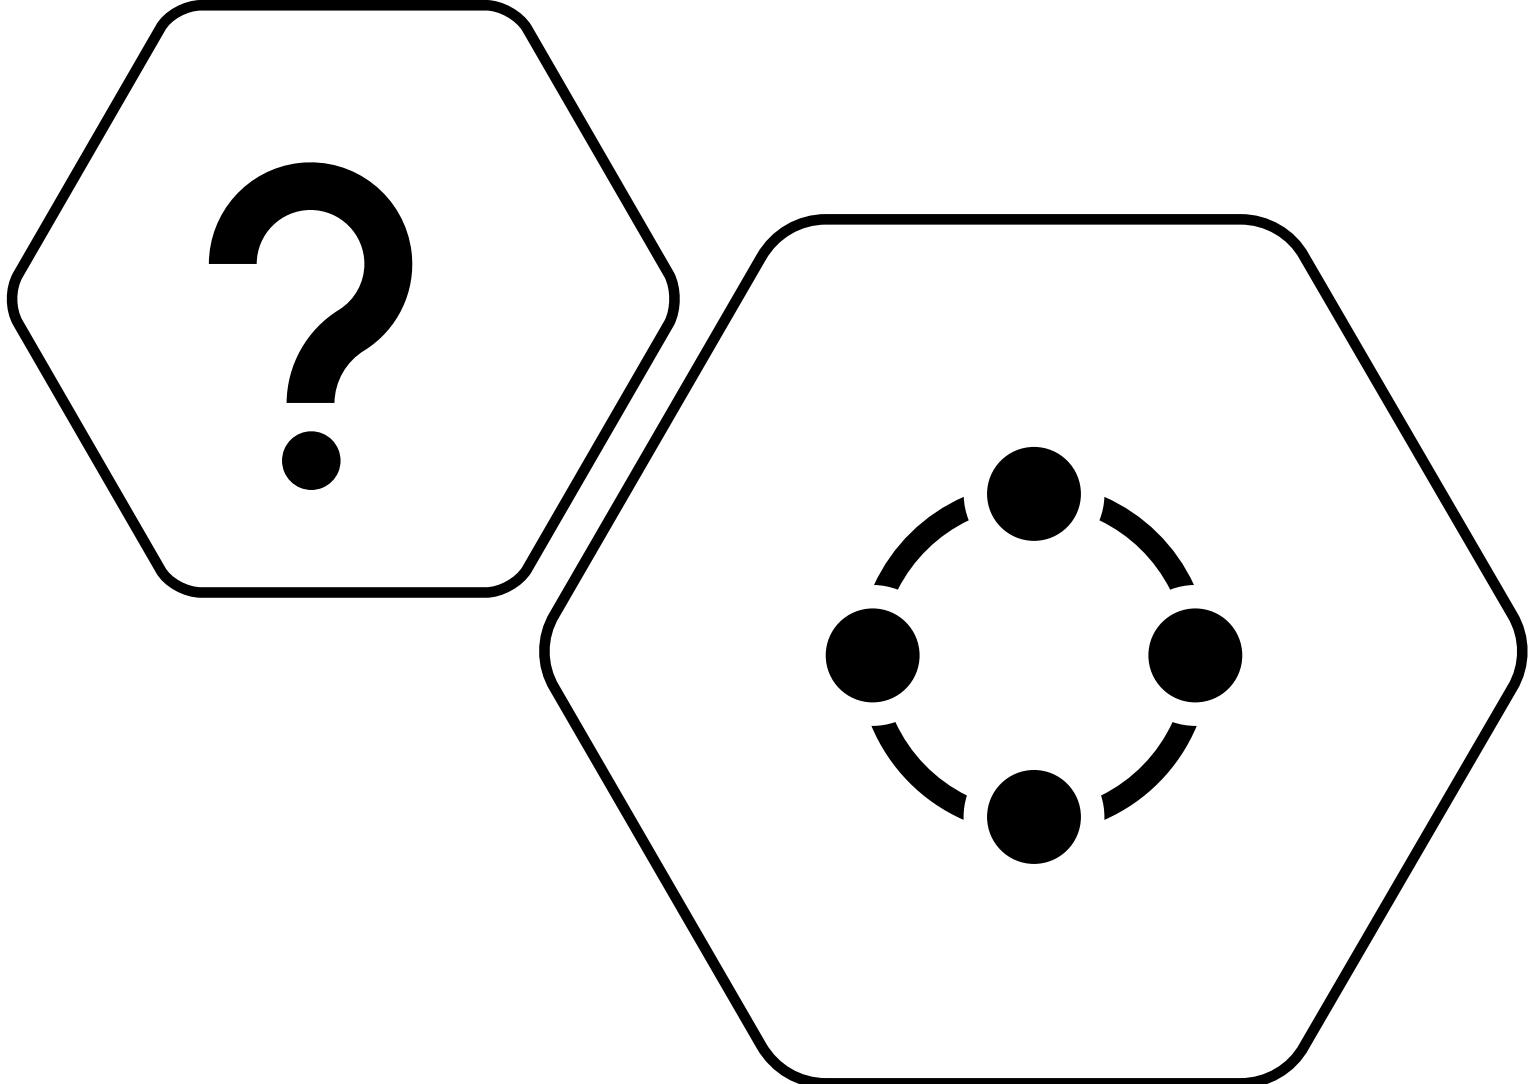

Stakeholders

International groups:

ICES (EGs), OSPAR, HELCOM,
DNAquaNet

National: advisors, regulators

- Scientists
- Industry representatives
- Conservation
- Consultancies, NGOs
- Students
